PROFESSIONAL SUMMARY

Information Science graduate (CGPA 9.10) with hands-on experience in security monitoring, incident simulation, and compliance-driven environments. Built a Wazuh SIEM/XDR home lab with file integrity monitoring, MITRE ATT&CK-mapped detections, and simulated attack validation. Completed an ISO 27001:2022 risk assessment and worked on GxP / 21 CFR Part 11 data-integrity controls at a pharmaceutical site. Seeking the Cyber Security Professional role at Siemens.

TECHNICAL SKILLS

SIEM & Monitoring: Wazuh SIEM/XDR, OpenSearch, File Integrity Monitoring (FIM), log collection & analysis, Splunk (learning)

Frameworks & Compliance: MITRE ATT&CK, ISO 27001:2022, OWASP Top 10, PCI DSS, GDPR, GxP / 21 CFR Part 11, ALCOA+

Security Practices: Threat detection, incident response simulation, log analysis, RBAC, audit-trail design, risk assessment

Tools: Nmap, Wireshark (learning), Burp Suite Community (learning), Docker, Git/GitHub, Linux/Unix

Programming: Python, SQL, Java (foundational)

PROFESSIONAL EXPERIENCE

Solutions Architect — Leucine Inc.

Dec 2025 – Present

Bengaluru, India (Intern: Jul – Nov 2025 • Full-time: Dec 2025 – Present)

- Digitised pharma e-logs by converting paper-based log formats into GxP-compliant digital forms using Leucine's no-code platform for a pharmaceutical manufacturing site.
- Configured digital logs to meet 21 CFR Part 11 and ALCOA+ requirements, ensuring data integrity, audit-trail completeness, and regulatory compliance.

IT Intern — Tech Mahindra (Client: LIC of India)

Oct 2024 – Jun 2025

Bengaluru, India

- Worked on the e-PGS enterprise insurance platform processing sensitive policyholder data; performed SQL data validation and supported Spring Boot authentication mechanisms for secure user access flows.

SECURITY PROJECTS

Home Lab SOC — Threat Detection & Attack Simulation

2024

- Deployed Wazuh SIEM/XDR on Docker (ARM64/macOS) with File Integrity Monitoring, rootcheck, and Security Configuration Assessment for continuous monitoring of host and network activity.
- Detected trojaned binaries and unauthorised port changes; alerts auto-mapped to MITRE ATT&CK, PCI DSS, and GDPR controls.
- Validated detection rules through simulated Nmap scans and file-tampering attacks; tuned configurations to reduce false positives.

ISO 27001:2022 Risk Assessment — Pharma e-Log System

2024

- Performed a full ISMS risk assessment for a pharma e-log system: built asset inventory, threat models, and a Risk Treatment Plan mapped to Annex A controls and 21 CFR Part 11; produced an audit-ready risk register and control-gap analysis.

Agri-Bot: Smart Agricultural Robot — IEEE Xplore

2023

- IoT robot with ML-based plant disease detection; published in IEEE Xplore — demonstrates applied Python, hardware-software integration, and end-to-end project delivery.

EDUCATION & CERTIFICATIONS

B.E. in Information Science — New Horizon College of Engineering

Jul 2025

CGPA: 9.10 / 10.0 (Distinction)

Certifications: Cybersecurity Fundamentals (HP AppScan) • RPA Developer Foundation (UiPath) • IELTS Academic 7.5 • CompTIA Security+ (pursuing)

TryHackMe: Active practitioner, Capability Score 40 — ongoing hands-on offensive & defensive labs.

Publication: "Agri-Bot: A Smart Agricultural Robot for Smart Irrigation and Leaf Detection" — IEEE Xplore.
